

## New SMD model metal detector

Advanced Metal Detection Technology

**Saimo Technology**

Saimo is dedicated to developing and applying the best technological solutions to the problem of metal contamination. Our new SMD model metal detector is the result of cooperation with our customers' engineering, quality assurance, and production personnel, to improve detection levels, reduce product waste, and lower the cost of ownership.

From the smallest companies to the largest food, healthcare, and consumer goods groups, our customers are initially attracted by our advanced technology, and return to us for the reliability and simplicity of our products.

## Applications

- Conveyor
- Gravity
- Pipeline
- Pharmaceutical
- Web Inspection
- Reverse detection

## Features:

- Simple to use
- High reliability & performance
- Digital Signal Processing
- Quick product changeover
- Twin film option
- Automatic balance

## Options:

- Communications support for:
  - RS-485
  - Ethernet
- Custom designed systems
- Consult us for other options

## Industries:

- C- Food
- Pharmaceutical
- Healthcare
- Beverage
- Chemicals
- Textile
- Paper

Catalog No.SG.E.MD01(2007).
